

The man of God as he was known and referred to in the Old Testament has become an endangered species. No other time in history has the onslaught of the enemy against the prophets of God been more intense than it is today. The release of demonic temptations and strongholds that has led to the downfall of many potential servants of God has left the society with little or no esteem for servants of God.

This book will help servants of God identify the seven key areas the enemy is using against them while at the same time equip them to battle and overcome the warfare of the enemy in their lives and ministries. This material is a must read for servant of God and for those they are preparing for the work of the ministry in this day and age.

J.Blest is a minister of the gospel with a calling to teach, preach and minister healing. He resides in Kenya with his family. He may be contacted for ministry engagements, publishing or printing work through;
